

Are you building or re-building a home or business in Valley of the Moon Water District (District)? If so, please see the following:

1. Please fill out the "New Service Checklist" and have your fire system designer provide a letter based on our "Example Fire Letter".
 - **Note:** Please make sure that all applicable information is complete before you submit it.
2. Is there, or will there be, a well or other auxiliary water source on your property as described in question 13 of the "New Service Checklist"?
 - **If yes:** Please refer to standard plan 7 for the installation of your RP backflow preventer. Please note that you will always want to match the backflow preventer size to the meter size; having a larger or smaller backflow preventer will impede your pressure and flow.
 - **If no:** Please refer to standard plan 6A for the installation of your DC backflow preventer. Please note that you will always want to match the backflow preventer size to the meter size; having a larger or smaller backflow preventer will impede your pressure and flow
3. Please submit all required documents including fire letter, full set of plans, copy of county permit, detailed irrigation plan, etc. to:
 - our office at 19039 Bay St. Sonoma **or**
 - Mail the documents to our PO Box 280, El Verano, CA 95433 **or**
 - Email the documents to us at CustomerService@vomwd.com (PDFs are great!)

Please note that any old service abandonment or paving that will be required as part of the installation of your new service line, are extra costs that the District will pass through to you without markup. Also, the District will install the line from our main in the street to the meter at the property line only. The backflow preventer and the line from there to the home/structure are not part of the scope of work for the District.

After we receive all of the pertinent information about your project, we will be able to provide you with an accurate price for the service line and meter. Work will commence after the District receives payment in full for the quoted amount along with a signed application (District staff to fill out and provide for your signature). Any extra costs from old service abandonment or paving will be billed after completion and are based on time and materials.
